

Amendments to the Specification:

Please replace paragraph [0008] - [0009] with the following rewritten paragraph:

[0008] Hence, in the past, it was necessary to knead a compounded mixture for forming a green body using a kneader and then feed the kneaded compounded mixture for forming a green body in to a batch type extruder, and such an operation was troublesome. Because of such problems, there is no effective method for enabling reuse of a green body per se as a raw material for forming a honeycomb body structure has been found yet, and rejected products of undried formed material are still being disposed as a waste.

SUMMARY

[0009] The present invention has been made in view of the above-mentioned problems of the prior art and aims at providing a process for producing a formed honeycomb body, which can reuse a rejected product of undried formed material as a raw material for forming a honeycomb body structure in an efficient manner.
